Good nutrition during pregnancy and lactation is important for you and your baby's health

- Pregnant and lactating mothers have additional nutritional needs.
- They are encouraged to consume a AT LEAST 4 OUT OF 6 food groups below every day to meet their nutrient needs and that of their babies.

Whole grains/cereals, starchy roots and tubers and plantains

Legumes, pulses, nuts and

Fruits

Animal-source foods

Vegetables

Healthy fats, oils and oil seeds

- During your pregnancy, eat 3 meals each day plus one extra small meal and 2 healthy snacks e.g., a sweet potato, a fruit, porridge, milk or ground nuts.
- During breastfeeding, eat 3 meals each day plus two extra small meals and 2 healthy snacks.
- Take your iron and folic acid supplements (IFA) daily with meals to improve your iron stores.
- Drink tea or coffee 1 hour before or after a meal to prevent interference with iron absorption.
- PRACTICE HYGIENE during food preparation, consumption and storage to prevent diarrhoea.
